

Brief CV

Name	Salman Riazi Mehdi Riazi	中文名		
Gender	Male	Title (Pro./Dr.)	Dr.	
Position (President...)	Senior Lecturer in Construction Management	Country/Region	Malaysia	
University/Department	School of Housing, Building and Planning, Universiti Sains Malaysia, 11800 USM, Penang			
Personal Website	-			
Research Area	Construction Supply Chain Management, Collaborative Working Environment, Quantity Surveying, Project Management			

Brief introduction of your research experience:

Generally, my main research areas are in Construction Supply Chain Management and Collaborative Working Environment whereby most of my research grants have relation to these subjects. Most of my research generally attempts to make use of Supply Chain Management (SCM) and also its tools to overcome many deficiencies in construction for example, project delays, low labor productivity, low profitability, fragmentation, etc. Other than that, I have also been making a lot of effort to use SCM and other collaborative working approaches to overcome deficiencies in Industrialized Building System (IBS) projects especially in term of the level of its uptake in the industry. Beyond that, being a Quantity Surveyor by background with some working experience in the industry, combined with a Ph.D. in Construction Economics, I also try to expand my research area into studies related to Quantity Surveying such as Life Cycle Cost Analysis, construction financial management, etc. as well as research in other areas related to Project Management.
